

Dear Families,

Enhancing your child's life with music supports all aspects of learning. Music is a highly effective way to communicate information and a valuable tool for teaching basic concepts. Christ the King Daycare is proud to offer music classes throughout the school year.

Our music program is based on a developmental approach to music education rather than a performance-oriented approach. This model builds on the understanding that significant development takes place before children are able to "speak" the language of music and confidently express themselves through singing and movement. Using a fun and participatory curriculum, children develop important life skills through tonality and rhythm exercises, singing, and movement activities that focus on motor skill development.

Music class is provided Tuesday through Thursday beginning in October. We will continue to follow our rotating ABC schedule for music classes. Students will perform for their families in a music recital on **Thursday, May 14, 2026** for Pre-K and **Friday, May 15, 2026** for 3-K and Daycare at **5:00 PM**.

We look forward to these performances and to seeing all that the children have learned!
